

## Chocolate sales over time

In this calculation, we look at sample data as a chocolate company where sales is the focus point. In this example stakeholders want to know how sales will do in the future base on forecast and if chocolate sales hit seasonality. The answer here is, sales are projected to stay steady, and seasonality happens when there is a peak. Which correlates with our “Chocolate Sales By Month” graph.

## Chocolate Sales by Month

In this calculation, we look at sample data as a chocolate company where sales is the focus point. In this example stakeholders want to know when chocolate sells the most? The answer here is chocolate sales most often happen during the holiday seasons, which correlates to our “Chocolate Sales Over Time” graph.
